PROFILE

A resilient and motivated team player with a goal to continue to expand my technical skills as a full-stack developer in a rapidly evolving industry. I've always been a firm believer that coding has limitless potential, and as someone who loves to learn I concluded that it was the right time to follow my passion.

My goal is to collaborate on web and mobile applications which solve real life problems related to the operations of businesses by adding structure or systems. With my diverse background of working with people I am able to uniquely identify and target problems that limit people or businesses so that they can grow.
